

## 37 // Weather Sensing: Cloud Observation

---

*for two participants or any number of pairs  
writing materials*

In pairs, pick a location and watch clouds for seven minutes.

While continuing to watch the clouds, freewrite for another seven minutes.

Read your writing to one another.

From your writing, pick two phrases that will become instructions for a dance.

One person performs a solo for five minutes with these instructions while the other witnesses.

The witness moves in response to what they saw in the solo.

Share observations and experiences.

Change roles.
